

# Complete Technology Solutions

## Comprehensive solutions For business, government, education, and healthcare

### Empower - Integrate - Optimize

Our forward-thinking solutions focus around information management while increasing levels of production, efficiency, & business automation by using technology such as:

- e-Discovery and deduplication
- Electronic workflows
- Performance management
- Advanced archiving & retention scheduling
- Electronic governance / security
- Enterprise application integration (EAI)
- Electronically stored information (ESI)
- Intelligent data, file & form capture
- Business process automation (BPA)
- Disaster recovery

### Add new levels of automation and performance with our Xcel platforms

Our information management departmental editions provide software tools to solve specific industry problems. Each industry platform provides business automation, systems integration and information management throughout an entire organization.

In addition to prebuilt processes, our cutting edge liquid GUI technology brings the software to life allowing it to mold to your specific business processes and needs.

### Industry-specific solutions

Our enterprise solutions make your business more efficient by combining the ease-of-use of our products with the features and the security your business requires. We design specialty solutions for industries, departments within industries and many different business processes. These solutions meet the needs of organizations of all sizes and easily integrate with existing business systems and applications. We tailor solutions for the following industries and business processes:

- Education (higher education & K-12)
- Healthcare
- Government
- Business & Technology
- Accounts Payable
- Human Resources

## Gov Xcel Solutions

Our Gov Xcel platform encompasses enterprise grade deployments that automate workflow and business processes in local, town, county and state government agencies. Automating processes within government agencies allow elected officials and department supervisors to increase citizen services without adding additional resources. Eliminate rekeying information into multiple databases. Stop distributing and storing multiple electronic-based or paper-based copies of a document. Know that your documents are secure while mitigating risk of litigation by fully complying with records retention schedules.

### Gov Xcel editions for:

- Purchasing
- Meeting Minutes/ Agendas
- Personnel
- Law Enforcement
- Homeland Security
- Jail
- County Clerk
- Probate Court
- Tax Board
- Courts
- IT

## Student Xcel solutions for higher education & K-12

Our Student Xcel platform is a suite of information management tools which allow school districts and higher education campuses to provide higher levels of education while complying more efficiently with all state and federal programs. With a centralized back end platform, each edition is designed to specifically enhance and solve information issues throughout K-12 school districts and higher education. Some of the Student Xcel editions provide information management in areas of eLearning, eDiscovery, student record archiving, eForms and version control, enrollment processes, SharePoint automation and archiving, RTI intervention process, human resources and accounts payable.

### K-12 editions include:

- RTI Automate
- Student Records
- e-Learning
- e-Discovery & Litigation
- eForms & Version Control
- StudentXcel Medicaid & Medicare
- Human Resources
- Accounts Payable
- Free & Reduced Meal Application

### Higher education editions include:

- eForms
- Enrollment
- Student Records
- Accounts Payable
- Human Resources
- e-Learning
- Financial Aid

## MedHealth Xcel solutions

The MedHealth Xcel platform is designed to control information technology through HIPAA compliancy. This suite of tools gives hospitals, physicians' offices and medical professionals an advantage in today's technology world.

### MedHealth Xcel editions include:

- eDiscovery
- Lab Outreach
- Patient File Archiving
- Medicaid and Medicare Payment Automation
- eForms
- HIPAA Compliancy
- HIPAA Data Integrations
- Automated Data, File & Information Capture
- File Conversion
- HL-7 Systems Integration
